

How volcanoes are made

This is a volcano . This is erupting

1. Plates Pressure then the rocks turn into magma.
2. Enormous pieces called Its surface is like a 3D puzzle.

- Heat make rock and pressure.
 - Volcano lava slowly explode.
 - **BOOM** they can destroy in a area minute
 - A volcano is a mountain that opens downward to a pool of molten rock below the surface of the earth. When pressure builds occur.
 - One volcano is as tall as a volcano from the sea up, erupti.
-
- **HOW A ROCK MELTS .**

- A ROCK MELTS IN A MANTAL AND IT GOS THOU A LAVA TUBE.
